

ZULFAHMI M ARDIANTO

0822-3822-6007 | zulfahmimaulana3@gmail.com | <https://www.linkedin.com/in/zulfahmi-m-ardianto/> | <https://github.com/7z1x>
Yogyakarta, Indonesia

Fresh graduate with a primary focus on Artificial Intelligence and Machine Learning, backed by hands-on experience in Android Development using Kotlin. Experienced in building end-to-end ML projects and AI agents, from development to deployment, using real-world workflows. Skilled in leveraging AI tools for debugging, problem-solving, and improving code quality, with a strong ability to adapt quickly in fast-paced environments.

Work Experiences

Wesclic Indonesia Neotech - Sleman, Yogyakarta Nov 2025 - Present
AI Engineer Intern

- Built and deployed an AI sales agent from scratch to automate and improve customer interactions
- Developed an AI “judge” system to evaluate and make chat responses more natural and human-like
- Designed end-to-end AI workflows, including prompting, evaluation, and deployment
- Worked with AI APIs (Gemini, Claude, OpenAI) for building and optimizing agent performance

Laskar AI - Remote Feb 2025 - Jul 2025
AI Engineer Cohort

- Led the development of BiSpeak, a web application to assist people with speech disabilities by recognizing hand gestures using MediaPipe and classifying them with a Random Forest algorithm
- Developed and deployed machine learning models on real-world datasets using classification, regression, and clustering techniques

Talent Scouting Academy Digital Talent Scholarship - Remote Feb 2024 - Jun 2024
Java Fundamentals & Java Programming Cohort

- Mastered core Java concepts including OOP, control structures, arrays, and collections.
- Built multiple console-based Java applications as learning projects.
- Completed final assessment and graduated with certification in Java Programming and Java Fundamental.

Bangkit Academy - Remote Aug 2023 - Jan 2024
Mobile Development Cohort

- Developed a capstone project called FED (Fertilized Egg Detector) an Android application that utilizes AI to detect fertilized eggs, contributing to innovation in the agricultural sector.
- Took full responsibility for end-to-end mobile app development, from UI/UX design to backend integration and implementation using Firebase and Kotlin.
- Collaborated with a cross-functional team including ML engineers and Cloud computing specialists to integrate AI model into the mobile application.

Education Level

Sunan Kalijaga State Islamic University Yogyakarta - Yogyakarta, Indonesia Sep 2021 - Aug 2025
Bachelor of Computer Science, 3.81/4.00

- Active member of Google Developer Student Clubs (GDSC), engaging in tech events, workshops, and collaborative projects.
- Appointed as Daily Activity Coordinator (PDD) during the Community Service Program (KKN), responsible for organizing and documenting daily activities and reports

Averos Senior High School - Sorong, Indonesia Jul 2018 - Jul 2021
Senior High School

- Appointed as the President of the Computer Club, where I led the planning and execution of tech-related activities, including managing the club's participation in the school's annual Fair.

Skills, Achievements & Other Experience

- Projects:** Developed BiSpeak (python gesture-based communication app), Gulu Gulu (Django search engine with cosine similarity), FED (fertilized egg detector Android app with kotlin), Target Masteri (2D shooting game using Gdot)
- Programming & Development:** Python (AI/ML), Kotlin (Android Development)
- AI / Machine Learning:** Machine Learning (classification, regression, clustering), LLM / AI Agent Development Prompt Engineering & Evaluation, NLP (text evaluation & human-like response tuning)
- Tools & Platforms:** Git, Docker, Firebase, Kaggle, Notion
